PENTHROX REGISTERED IN MIDDLE EAST

Medical Developments International Limited (ASX:MVP) today announced its first international registration of its pain relief drug outside of Australia and New Zealand. Pentrox has been awarded registration in the six Gulf Co-operation Council States (Saudi Arabia, Bahrain, Qatar, Oman, UAE and Kuwait).

Dr Simon Fisher, Chief Executive Officer of MVP said that “the registration is the culmination of a significant amount of work, and opens up markets in six affluent States and approximately 40 million people. We are confident that the attractive features of Pentrox, which have made it a leading pain-relief drug in Australian Ambulance, and in the defence forces, dentistry and extreme sports, will also drive sales in the Middle East.”

Pentrox was approved by the Executive Board of the Health Ministers’ Council for the Co-operation Council States at a meeting held in Kuwait earlier this month. The Health Ministers’ Council is an umbrella organisation with representatives from each of the countries in the GCC. Approval by the Council was the last major hurdle to be cleared - while registration in each individual country is still required for pricing and other purposes, this is a formality.

Medical Developments has been marketing in advance the benefits of the drug for some time in the build up to registration and we expect early sales. The distribution strategy for the region is advanced and we expect to finalise distribution agreements shortly with the help of Means Marketing; our agents in Dubai. Significant sales are expected in the second-half of FY07.

The Company will make a further announcement in the near future with an update on the registration process in other jurisdictions.

About Medical Developments International Limited

MVP is a leader in emergency pain relief and respiratory products. The company manufactures a fast acting pre-hospital and emergency pain relief product called Pentrox. Commonly referred to as the “Green Whistle”, it is used in all Australian Ambulance Services, the Australian Defence Forces, extreme sports from AFL to Skiing, and dentistry.
