

LANA Anaesthetic Machine

“Anaesthesia for all animals – LARGE and small”

Recommended

- For the administration of anaesthesia to LARGE and small animals

Key Product Highlights

- Two machines in one – a combined anesthetic machine for LARGE and small animals
- Ease of emptying and refilling carbon dioxide absorber (under two minutes)
- Low resistance breathing circuits (hose-in-hose)
- Features a multiple flow-rate regulator with oxygen flush button
- Lower operating costs
- Incorporates a breathing monitor for added security
- Trolley mounted for ease of transport to any location (with oxygen cylinder support)

Unique emptying and refilling Carbon Dioxide Absorber

- Absorber is rotated 180° for simple emptying and refilling (under two minutes)
- Absorber is compact – 50 mm wide opening with 4 kg capacity
- The need to lift and manipulate bulky absorbers is eliminated
